Office Memorandum

Subject: Affiliation of CTS/CITS trades of NSTIs (including NSTI(W)) – Reg.

NSTIs are the premier institutes under DGT that have been entrusted with the responsibility of training of craft instructors of the ITIs. However, it has been observed that the labs / workshops of many trades are housing outdated non-functional machines/equipment. The classrooms, laboratories and even corridors are full of broken furniture and machines and bundles of old papers/files. Despite the availability of budget, there is a very poor maintenance of machinery and general infrastructure of many institutes. Ceilings/Walls are at many places are leaking, and paint has peeled off. Software used is sometimes non-genuine. Availability of relevant master trainers for the trades/courses being offered is also not being ascertained. With such a scenario, NSTIs are unfair to the trainees who are undergoing courses with poor infrastructure and instructors of unrelated trades.

To bring sanity to the system of offering courses by NSTIs under CTS/CITS trades, it has been decided that new admissions in all CTS and CITS courses would be allowed only after affiliation of trades/courses as per norms. Each NSTI must undertake self-inspection as per norms and send the same along with photos/videos of the equipment/machinery, workshops and hostel building etc. NSTIs must also prepare a comprehensive list of shortage of machinery and equipment for the courses being offered as per NCVT/NSQF approved norms. The timeline for procurement of such equipment & machinery should also be prepared clearly.

In order to offer instructor training under CITS in all the CTS trades, a list of mapped CTS-CITS trades has been prepared and circulated to all NSTIs. The curriculum for CITS trade for the group of mapped CTS trades is under finalization by CSTARI Kolkata, in consultation with the respective NSTI. The list is attached for ready reference. Hence, while reviewing the required infrastructure for a CITS trade, Directors/ Principals, NSTI should also include the equipment/machinery for the mapped CTS trades. However, till the time infrastructure is completed in NSTIs for the mapped CTS trades, as an alternative, one-week off-campus training may be tied up with industries for exposing the trainees to the equipment of the corresponding CTS trades.

As you all are aware that 'Swachatta' has been one of the topmost focus of our Hon'ble Prime Minister. Now it is on all NSTIs to ensure its implementation through overall campus aesthetic improvement. Hence, all the Directors/ Principals, NSTI should initiate a drive and ensure condemnation of non-functional obsolete machinery/ equipment and broken furniture immediately. Pirated software should be deleted from all the computers/machines. Old files and documents must be weeded out after following due procedure. The campus environment management measures such as maintenance of better sanitation, drainage, water, power, first aid, waste collection and disposal arrangements, barrier free access for students with disability, proper signage, landscaping and tree plantation must be ensured. All laboratories must have proper safety signages, charts, tools and practices.

12

Our students, majority of whom are from SC/ST and most deprived sections of society, must be offered a dignified stay. Hostel rooms, bathrooms, canteen etc. can not be shabby. Any affiliation proposal from NSTI must include video evidence of the status of our Hostels.

Solar power panels to maximum extent must be put on roofs and maybe even one-acre land can be earmarked for solar power generation. At least one-acre land should be earmarked for Smart Agriculture. These two activities are MANDATORY for all NSTI, subject to availability of land.

As it has been reiterated during various interactions, the NSTIs are encouraged to take up new-age CTS courses as listed below:

1. Geo Informatics Assistant
2. Aeronautical Structure and Equipment Fitter
3. Additive Manufacturing Technician (3D Printing)
4. Remotely Piloted Aircraft (RPA)/Drone Pilot
5. Electrician Power Distribution
6. Technician Mechatronics
7. Solar Technician (Electrical)
8. Internet of Things (Smart Agriculture)
9. Internet of Things (Smart Healthcare)
10. Internet of Things (Smart City)
11. Smartphone Technician Cum App Tester

These courses could be offered by NSTIs for a period of 3 years, or till such time that at least 10 ITIs in the states corresponding to that NSTI start offering such courses. Special batches in at least two of these courses must be started in March 2019 session in every NSTI - in such cases self-inspection report would also be accepted on fulfilling the desired norms and guidelines.

All NSTIs should complete this process of self-inspection by 15th February 2019. A team will be created at DGT for completion of review of such reports by 28th Feb. 2019. A meeting of Affiliation Committee will be held in first week of March 2019. Only those trades under CTS/CITS that clear the affiliation norms would be allowed to be offered at NSTIs in academic session 2019-20. NIMI online admission portal will show only those CITS trades which have been cleared by the Affiliation Committee and approved by DG. The courses for which affiliation is not approved, faculty of such courses would be shifted elsewhere to utilize their services effectively.

For immediate action by all RDSDE, and Heads /Principals of all NSTIs.

* Category A represents NSQF alligned lab for CITS courses

Category B represents CTS trades for which CITS course has been aligned to cover exposure to the lab/equipment of the CTS trade and the same should be made available. The trainers who are certified under CITS / RPL scheme of Category A, with one week of refresher course undergone in any of NSTIs, will be the eligible trainers for Category B.

Category C : Will be conveyed later.
